Experience

2021, 2023

Camp Development Team Leader

SITCON

Students' Information Technology Conference

- Led a team of developers to build the event website, which provided information to attendees.
- Coordinated with designers, project managers, and other teams to ensure smooth development and timely delivery of the [website](#) (sitcon.camp/2023, sitcon.camp/2021).

2022

Development Team Leader

SITCON

Students' Information Technology Conference

- Led a team of developers to build the [conference website](#) (sitcon.org/2022).
- Generated social preview images for each conference session, allowing users to share session links with attractive previews.
- Achieved a **50% increase in construction speed** compared to the previous year's conference website by leveraging Vue 3.

Education

2020 - 2024

National Taipei University of Technology (NTUT)

Information and Finance Management

Skills

Back-end

Proficient in building server-side applications using **Node.js** and **Express.js**. And experienced in creating and managing RESTful APIs using Node.js.

2017 - 2020

National Douliou Vocational High School of Home

Economics & Commerce

Data Processing Department

Front-end

I have experience developing responsive and user-friendly web interfaces with **Vue.js** and **React.js**. And familiar with third-party libraries like **vue-router**, **Piana** and **Framer Motion**.

Projects

NTUT Course (北科課程好朋友)

Crawler, IndexedDB, PWA, Vue, Nuxt, GitHub Actions

NTUT Course (北科課程好朋友) is a web application that provides course information for students at National Taipei University of Technology (NTUT)

<https://ntut-course.gnehhs.net/>

- Convenient feature that allows users to import courses directly into their personal calendars, making it easier for students to keep track of their schedules.
- An attractive and responsive user interface with advanced search and conflict identification functionalities make course scheduling hassle-free.
- Over **12,000 visitors** in the past year.

TaiwanZipcode (台灣 3+3 郵遞區號查詢)

Vue 3, Vite, SASS, GitHub Actions

TaiwanZipcode is a web-based tool that allows users to search for the 3+3 postal codes of locations in Taiwan using keywords.

<https://zipcode.gnehhs.net/>

- The user interface includes an autocomplete input field, which allows users to quickly find the location they are looking for and retrieve the corresponding postal code.
- The tool is built with modern web development technologies and responsive design, making it accessible and user-friendly across a variety of devices.
- Unlike the official Taiwan Post website, TaiwanZipcode doesn't require users to enter a verification code before accessing search results.
